“It is one of those rare game that I would pay full price for.” – ROCKMILL “I was drawn into the game right away and was immediately captivated by the story.” – [PC] Dungeon, Jimenez, Dallas, TX “I played for 30 hours in one sitting.” – RockMILL “Thank you so much for playing Tarnished. We are going to use it as our pre-show case for our consoles and to see if it is in line with the ‘deeper connection’ that we are planning to add to future entries. Thanks again.” – – Atlas “Imagine if Final Fantasy [X] had been published as a free-to-play game; that’s basically what Tarnished is.” – RPG Nexus “This is a game that obviously cost a lot of money to develop, so I’m still a bit awed that I can play it for free.” – RPG MegaLux “You may find the game a bit short on content compared to some games. However, if you are willing to look past that, you will find a game that will scratch that role-playing itch for even the most hardcore JRPG fans.” – Gamegrin “It’s essentially a linear MMORPG in the style of Final Fantasy, only less RPG-like, and with more action and less story, and it has a fucking amazing soundtrack. ” – Tactithestars.blogspot “Tarnished is a game that tells a story that is part anime, part RPG, part action-game and part Hotline... and that’s not just saying it looks like a “Hotline” game, I mean it really is a Hotline game.” – IGN “Tarnished is a JRPG with an emphasis on story and social interaction.” – Gamezone “The game is very well done with great character designs and really neat character progression and development.” – Press 2Play “Tarnished is a more in-depth version of the Hotline series with the same sort of charm and social-network elements that made Hotline so much fun.” – Press 2Play THE NEW FANTASY ACTION RPG. But then she coldn’t help it. What is the number for? I had always seemed real at dawn. He had been shot up in the neck with a strange gun, and at each wound his own power center had stirred again, recalling the earlier ebbs and flows of pain. To Joan he had once told of how he had helped a small town in Virginia get out of a jam. He had just been a summer student, not far from Yale, when this man had been elected town captain. The Broken Star – Lev Grossman Shifty eyes, a quick tongue, a smooth routine: Jack Walsh is a practitioner of political sleight of hand. He’s also a partner at a Chicago law firm. Jack serves rich businessmen and likes his work. His partner, Alma, is a former political assassin who likes her work and has a soft touch. She’s as devious as he is. Everyone is a potential opponent. Walsh and Alma are both in love with their wife, Rachel. But Rachel loves the money she makes as a society hostess. Then she meets a business man named Jerry Shepard, and they fall in love. “He couldn’t kiss her. He couldn’t even touch her hand. It was as if his body was scarred. He couldn’t imagine passing her, touching his hand to hers; it would be a deeply vulgar and disrespectful act. And even if he could do it, what were the odds that their love would be reciprocated?” I’m not an underdog. I don’t want to see myself as one. **"RPG Maker MV v20.2 for Mac is on pre-sale. At this price, buy a copy and save it for yourself. Buy without a doubt," the official website for RPG Maker MV said. This story was contributed by Jakob Duvall and Mark Zaoui.Q: vbs Date format convert I'm using vbscript to format some dates from the Config.xml file. source = objXmlDoc.selectSingleNode("/Config/monthlyData/monthlySum[@month='1']"). innerText For this I use month = ""1"" to set the month. Then this month is echoing, and works. Now I'd like to change the format so that it would be formatted like m/d/y. Like this 0/0/0 I've tried the following, but it doesn't work. For example if i try to set 0/10/1 - it says no match found. month = ""0"" A: Here's a method that shouldn't require you to construct more "advanced" versions of the formats. source = objXmlDoc.selectSingleNode("/Config/monthlyData/monthlySum[@month='1']"). innerText For this you'll need to convert to a string. monthStr = monthStr & "" & month & "" You're not using the IfError so you can just get the length of monthStr. lengthOfMonth = Len(monthStr) Now, you need to format the string the way you want, you can start with something like. monthStrModified = "" & monthStr & "" Then to add a '/' between the months and days use something like Elself monthStr = "/" Or monthStr = "" Then monthStrModified = monthStrModified & "/0/" End If Then Finally, your final modified string is the "Modified" version. Which is monthStrModified = monthStrModified & "/0/" Use this line and you'll have a string that's in your format. SCCM exammle for windows 7 SCCM examm**
