I've looked at numerous ways to do it, but none of them seem to work. Here is what I've tried: # In the home.html file {% load static %} # In my urls.py url(r'^admin/', admin.site.urls), # In the base.html file # In the base.html.xml file I am very new to Python and Django, and I have just now been learning how to create a Django project after successfully installing the Django and virtualenv tools. Could somebody please help? Thanks in advance! A: What you did should work if your CSS is in css/admin directory. If you placed it elsewhere, you'll need to specify the path to

In it's 10 years of operation, it's had its problems, but also earned a place as one of the world's best V8's. The Model T's 3.8" Buick V8 was the world's first mass produced large-block engine. The Model T's 110hp crank was less than half the horsepower of modern V8s. The Model T sold over 6 million units and is the world's most produced automobile. Of all the 3.8" V8s built by the late 1950s, the 3.8" V8 is the most famous. But in the last decade it has been forgotten. Only about 1/3 of the original high-compression Dodge V8s still exist. Yet more than half of them are running. It's believed they have no mechanical problems and are in no need of repairs. DODGE V8 FORD CHEVY MAZDASport would like to thank anyone who has donated to our goal. Your generosity has helped us to create a first-class website and continue growing. Multiple transactions are encouraged.) Every year Ford reintroduces its classic Chevrolet engine, the legendary 225 cu.in. V8. The smaller 2-valve V8 from the 1983 Ford Bronco was replaced with the 3.8 V8, with extra valves in the intake and exhaust. It has a supercharged version, called the Super Cobra Jet, that pumps out 660 hp. This engine is also fitted in the 2000-2004 Ford Bronco. While not a very common engine, I suppose that when you go down the list of mass produced vehicles with that size engine, it's a fairly common size: Ford Bronco/SMMT Ranger Chevrolet Silverado Chevrolet Tahoe d0c515b9f4
