On top of the game "Kid Icarus" which popularized the "metroidvania" genre on the NES, this is a fast-paced, turn-based JRPG full of action. The essence of the Metroidvania genre is said to be repeating the circles of experience of action! All Circles From the very beginning, this game has a fast-paced feel to it. It is not "easy". The game offers a battle system in which victories are measured in real terms, such as time, ratio, and HP. There are many control options, such as a touch screen, controller, and tilt controls. Art and Artwork In addition to the sounds of Kid Icarus, we have added the game sound effects from the game in our track. I even looked into a lot of stack overflow posts, but I can't get my app to work. I want to remove the UISearchBar and replace it with a UITableViewController with a search bar at the bottom which will only return a list of options I provide it from an NSMutableArray. This is my code: AppDelegate.h

```
#import @interface AppDelegate : UIResponder @property (strong, nonatomic) UIWindow *window;
@property (strong, nonatomic) UITableViewController *tableViewController; @property (nonatomic,
strong) NSMutableArray *array; @end AppDelegate.m #import "AppDelegate.h" #import

"UISearchDisplayDelegate.h" @interface AppDelegate () @end @implementation AppDelegate -
(BOOL)application:(UIApplication *)application didFinishLaunchingWithOptions:(NSDictionary
*)launchOptions { self.window = [[UIWindow alloc] initWithFrame:[[UIScreen mainScreen] bounds]];
if (self.array == nil) { self.array = [[NSMutableArray alloc] init]; } UISearchDisplayController
*mySearchDisplayController = [[UISearchDisplayController alloc] initWithSearchBar:self.searchBar
contentsController:self]; [self.tableViewController setTableViewStyle:UITableViewStylePlain];
